IAM-Policies-Assignment---2

Specify permissions Info

Add permissions by selecting services, actions, resources, and conditions. Build permission statements using the JSON editor.

| Policy editor | Visual JSON Actions ▼ |
|---|---------------------------|
| ▼ S3 Allow All actions | |
| Specify what actions can be performed on specific resources in S3. | |
| ▼ Actions allowed | |
| Specify actions from the service to be allowed. | |
| Q Filter Actions | Effect Allow O Deny |
| Manual actions Add actions | |
| ✓ All S3 actions (s3:*) | |
| Access level | Expand all Collapse all |
| ▶ List (Selected 15/15) | |
| ▶ Read (Selected 60/60) | |
| ▶ Write (Selected 56/56) | |
| ▶ Permissions management (Selected 15/15) | |
| ► Tagging (Selected 12/12) | |
| Required permissions not selected. To grant permissions for the selected resource actions, you must include additional required actions • s3:CreateJob requires 1 more action. • s3:PutReplicationConfiguration requires 1 more action. | |
| ▼ Resources | |
| Specify resource ARNs for these actions. | |
| O Soutific | |
| ○ Specific | |
| ↑ The all wildcard ** may be overly permissive for the selected actions. Allowing specific ARNs for these service resources can improve security. | |
| ▶ Request conditions - optional | |
| Actions on resources are allowed or denied only when these conditions are met. | |

▼ EC2

Specify what actions can be performed on specific resources in EC2.

▼ Actions allowed

Specify actions from the service to be allowed.

Q Filter Actions

Effect

Expand all | Collapse all

O Allow ○ Deny

Manual actions | Add actions

☐ All EC2 actions (ec2:*)

Access level

- ▶ List (Selected 9/172)
- Read (35)
- ▶ Write (Selected 5/417)
- Permissions management (5)
- ▶ Tagging (Selected 1/2)

Required permissions not selected.

Required permissions not selected.

To grant permissions for the selected resource actions, you must include additional required actions

- ec2:CreateKeyPair requires 1 more action.
- ec2:CreateNetworkInterface requires 1 more action.
- ec2:CreateVolume requires 1 more action.

▼ Resources

Specify resource ARNs for these actions.

All

Specific

↑ The all wildcard '* may be overly permissive for the selected actions. Allowing specific ARNs for these service resources can improve security.

▶ Request conditions - optional

Actions on resources are allowed or denied only when these conditions are met.

▼ RDS

○ Allow ○ Deny

Expand all | Collapse all

Effect

Specify what actions can be performed on specific resources in RDS.

Actions allowed

Specify actions from the service to be allowed.

Q Filter Actions

Manual actions | Add actions

All RDS actions (rds:*)

Access level

- ▶ List (Selected 45/45)
- ▶ Read (Selected 5/5)
- ▶ Write (Selected 113/113)
- ▶ Permissions management (Selected 1/1)
- ▶ Tagging (Selected 2/2)

Required permissions not selected.

Required permissions not selected.

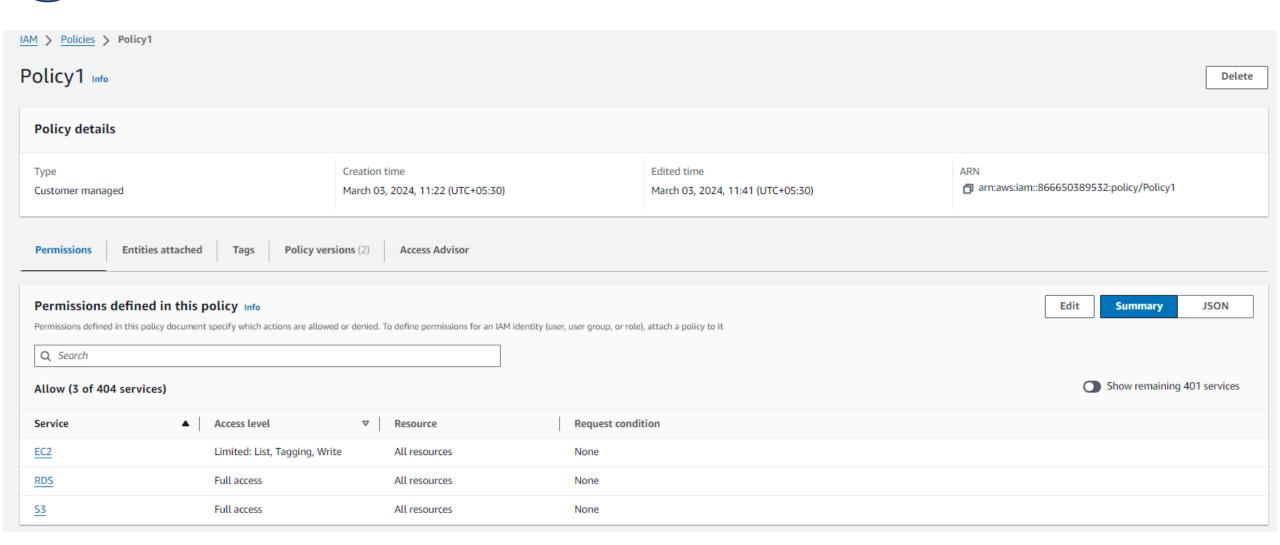

To grant permissions for the selected resource actions, you must include additional required actions

- rds:AddRoleToDBCluster requires 1 more action.
- rds:AddRoleToDBInstance requires 1 more action.
- rds:CopyDBClusterParameterGroup requires 1 more action.
- rds:CopyDBClusterSnapshot requires 1 more action.
- rds:CopyDBParameterGroup requires 1 more action.
- rds:CopyDBSnapshot requires 1 more action.
- rds:CopyOptionGroup requires 1 more action.
- rds:CreateBlueGreenDeployment requires <u>5 more</u> actions.
- rds:CreateCustomDBEngineVersion requires 3 more actions.
- rds:CreateDBCluster requires 9 more actions.
- rds:CreateDBClusterEndpoint requires 1 more action.
- rds:CreateDBClusterParameterGroup requires 1 more action.
- rds:CreateDBClusterSnapshot requires 1 more action.
- rds:CreateDBInstance requires 9 more actions.
- rds:CreateDBInstanceReadReplica requires 2 more actions.
- rds:CreateDBParameterGroup requires 1 more action.
- · rds:CreateDBProxy requires 1 more action.
- rds:CreateDBSecurityGroup requires 1 more action.
- rds:CreateDBSnapshot requires 1 more action.
- rds:CreateDBSubnetGroup requires 1 more action.
- rds:CreateEventSubscription requires 1 more action.
- rds:CreateIntegration requires 3 more actions.
- rds:CreateOptionGroup requires 1 more action.
- rds:CreateTenantDatabase requires <u>1 more</u> action.
- rds:DeleteBlueGreenDeployment requires 3 more actions.
- rds:DeleteDBCluster requires 1 more action.

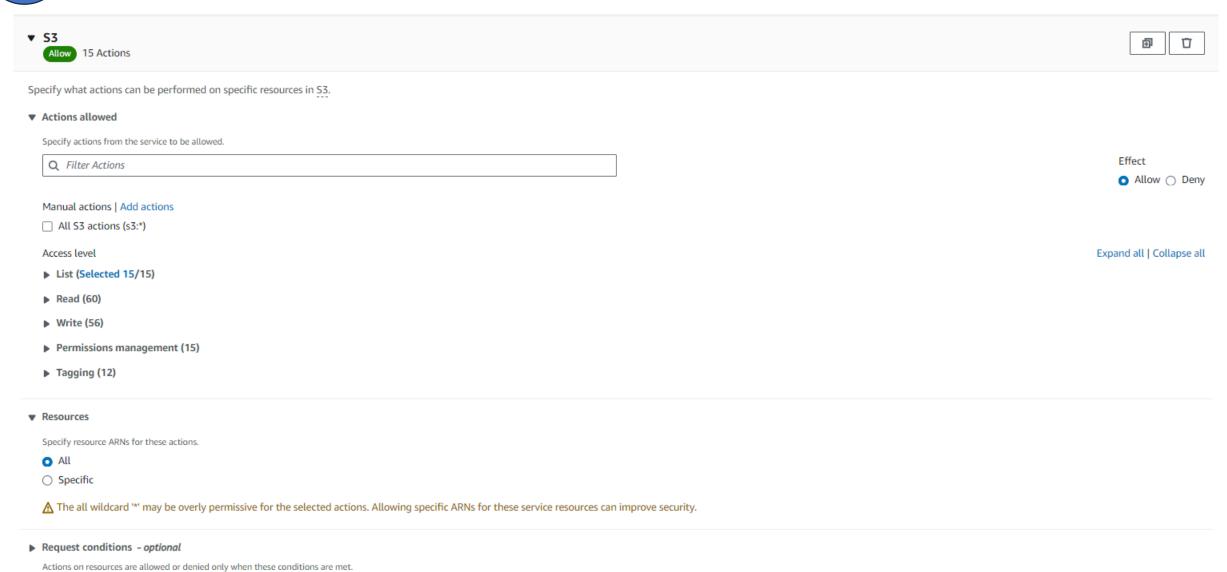

| ▼ CloudWatch Allow All actions | ā Ū |
|--|---------------------------|
| Specify what actions can be performed on specific resources in CloudWatch. | |
| ▼ Actions allowed | |
| Specify actions from the service to be allowed. | |
| Q Filter Actions | Effect ○ Allow ○ Deny |
| Manual actions Add actions | |
| ✓ All CloudWatch actions (cloudwatch:*) | |
| Access level | Expand all Collapse all |
| ▶ List (Selected 6/6) | |
| ▶ Read (Selected 20/20) | |
| ▶ Write (Selected 25/25) | |
| ► Tagging (Selected 2/2) | |
| ▼ Resources | |
| Specify resource ARNs for these actions. | |
| All | |
| ○ Specific | |
| ⚠ The all wildcard '*' may be overly permissive for the selected actions. Allowing specific ARNs for these service resources can improve security. | |
| ▶ Request conditions - optional | |
| Actions on resources are allowed or denied only when these conditions are met. | |

Actions on resources are allowed or denied only when these conditions are met.

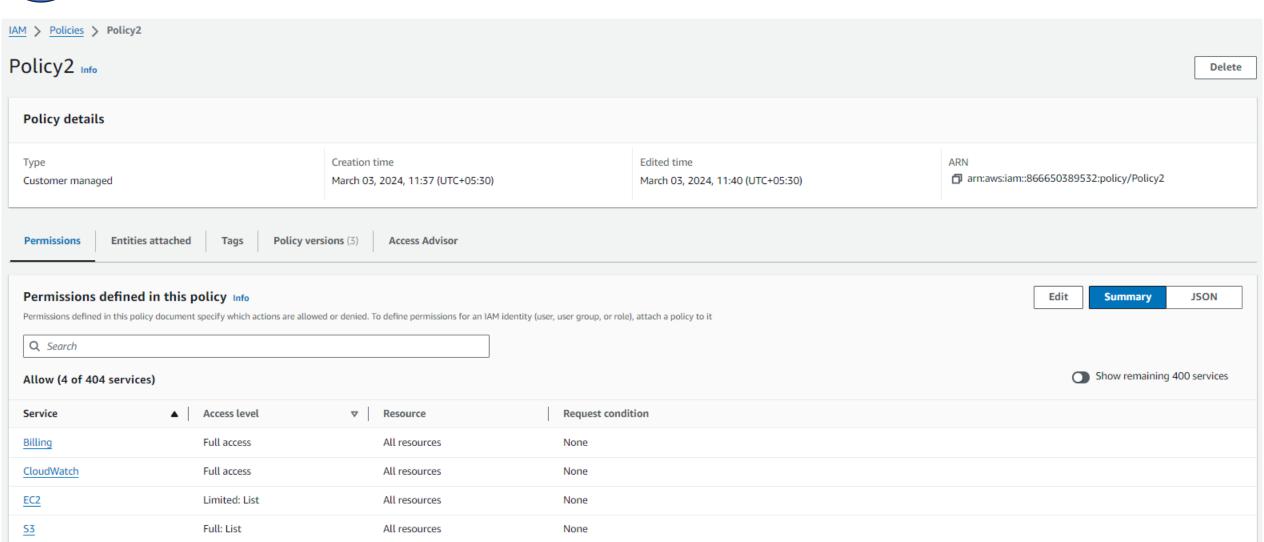

| ▼ Billing Allow All actions | |
|---|---------------------------|
| Specify what actions can be performed on specific resources in Billing. | |
| ▼ Actions allowed | |
| Specify actions from the service to be allowed. | |
| Q Filter Actions | Effect |
| | ● Allow ○ Deny |
| Manual actions Add actions | |
| ✓ All Billing actions (billing:*) | |
| Access level | Expand all Collapse all |
| ▶ Read (Selected 9/9) | |
| ▶ Write (Selected 4/4) | |
| ▼ Resources | |
| Specify resource ARNs for these actions. | |
| All | |
| Specific | |
| (i) Selected actions only support the all resources wildcard("*"). | |
| ▶ Request conditions - optional | |

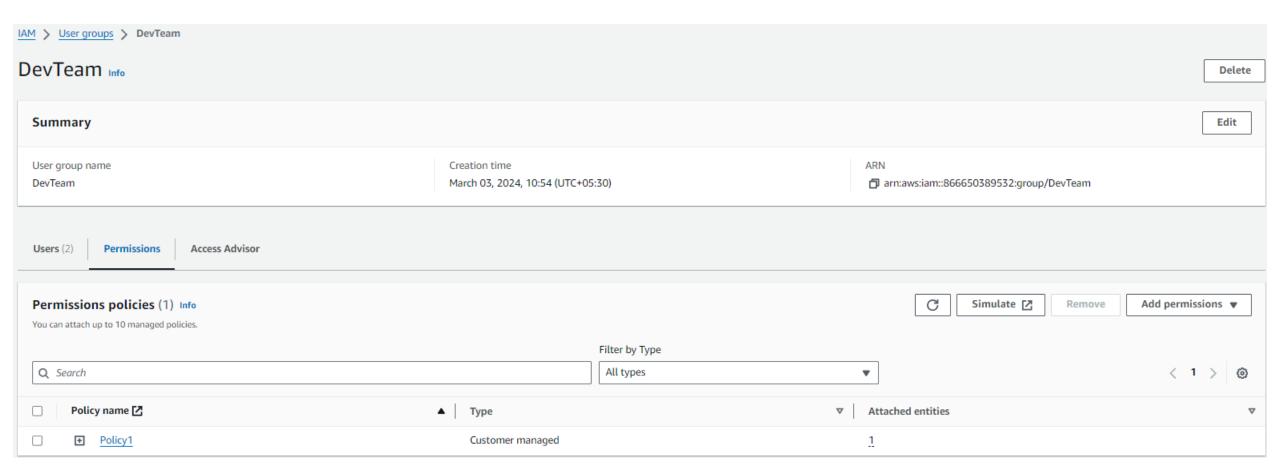

| ▼ EC2 Allow 23 Actions | ā T |
|--|---------------------------|
| Specify what actions can be performed on specific resources in EC2. | |
| ▼ Actions allowed | |
| Specify actions from the service to be allowed. | |
| Q Filter Actions | Effect |
| | ● Allow ○ Deny |
| Manual actions Add actions | |
| ☐ All EC2 actions (ec2:*) | |
| Access level | Expand all Collapse all |
| ▶ List (Selected 23/172) | |
| ▶ Read (35) | |
| ▶ Write (417) | |
| ▶ Permissions management (5) | |
| ► Tagging (2) | |
| Required permissions not selected. To grant permissions for the selected resource actions, you must include additional required actions • ec2:DescribeLaunchTemplateVersions requires 1 more action. | |
| ▼ Resources | |
| Specify resource ARNs for these actions. | |
| All | |
| ○ Specific | |
| ⚠ The all wildcard '*' may be overly permissive for the selected actions. Allowing specific ARNs for these service resources can | n improve security. |
| ▶ Request conditions - optional | |
| Actions on resources are allowed or depied only when these conditions are met | |
